I am Ethan, a dedicated professional with a strong passion for problem-solving and supporting others. My primary interests lie in the fields of cybersecurity, whether that be threat intelligence, incident response, endpoint detection or policy enforcement. I am an independent and proficient worker who values collaboration and is not hesitant to seek guidance when needed.

Beyond my professional pursuits, I am deeply interested in emerging security technologies and enjoy engaging in activities that expand my knowledge, including participating in Capture the Flag competitions.

> Experience

The University of Sydney - Honors Research Student

February 2024 - December 2024

- Worked with the **Sensors, Cloud and Services Lab** to independently design and develop an innovative framework to predict - using exclusively image metadata - the social network provenance of images shared online.
- Applied persistent work ethic to submit four comprehensive research papers to the 2025 Web Conference (**WWW 2025**), The International Conference of Pervasive Computing (**Percom 2025**), The International Conference on Service Oriented Computing (**ICSOC 2024**) and the International Conference on Ubiquitous Computing (**Ubicomp 2024**).
- Served as a **domain-knowledgeable reviewer** for the 2025 Web Conference.

Google - Security Engineering Intern

November 2023 - February 2024

- Worked with the **Incident Management and Data Forensics** team, gaining practical experience in **triaging, investigating, and mitigating** operational incidents.
- Learnt and applied Google development practices, which resulted in gaining experience with the company's **dynamic** and **scalable software development** methodologies.
- Designed and developed an **Incident Management training platform** that uses a **Large Language Model** to mark user responses.
- Leveraged my understanding of **Python, Javascript, HTML/CSS, Version Control Systems, Dependency Managers** and **CI/CD pipelines** to build the training platform for **~80 international Google engineers**..

Cisco - Technical Intern

July 2023 - September 2023

- Expanded knowledge on established and emerging technologies by engaging with industry professionals at Cisco.
- Gained experience with specific Cisco products like **Meraki, SecureX, Catalyst**, and their security suite.
- Worked alongside an international Cohort of 21 interns to provide business plans to real customers.
- Completed an internal accreditation scheme aimed to educate account managers in applying Cisco products as a business solution.

David Jones Hornsby - Customer Service Desk Representative

November 2020 - December 2023

- Developed **problem-solving** skills by being the first point of contact for customer and staff issues, including refunds, returns, customer **feedback, salesforce** communication, and cash variances.
- Sharpened **critical thinking** and **adaptability** by finding solutions to diverse customer problems promptly and effectively.
- Achieved excellent customer service by consistently exceeding **sales KPI** expectations and accruing **>\$1,000,000 in transactions**.

> Education

The University Of Sydney - Bachelor of Advanced Computing (Hons)

Majoring in Computer Science with a minor in Cybersecurity

January 2021 - December 2024

Most Recent WAM: 86

Overall WAM: 83
